Basic Knowledge

1.1Brief Introduction

Thank you for purchasing the Aspera R6. This instruction manual can be used to guide you to understand the functions and features.

In addition to common call functions and records, this phone also provides you a variety of useful features and services. Understanding how to operate your phone will enable you to access and use all of its features and capabilities.

Some of the services and functions described in this manual depend on the network. Therefore, some menu items in the phone may not be available, or various menus and functions of the phone may behave differently than intended.

Aspera reserves the right to modify the contents of this manual without prior notice.

1.2General Considerations

- Your phone can only use our designated batteries and chargers. Using other products may cause battery leakage, overheating, explosion and fire.
- Do not put the battery, mobile phone or charger in a microwave oven or near high-pressure equipment, it may cause circuit damage, fire or other accidents.
- Keep the phone away from children's reach to avoid them testing it as a toy, causing personal injury.
- Aeroplanes, hospitals and other places may prohibit the use of mobile phones, please turn off the phone.
- Do not use the mobile phone near high-precision electronic equipment. Radio wave interference may cause incorrect operation of the electronic equipment and other problems.
- Do not disassemble or modify the phone, it may cause damage, leakage and circuit faults to the phone.
- Avoid placing your mobile phone too close to magnetic objects such as magnetic cards. Mobile phone radiation may clear data from a savings card, or credit card.

1.3Battery Precautions

- The use of your mobile phone battery life is limited. With frequent charging the battery will degrade over time, gradually shortening its life. In this case the battery may be replaced when you notice it is not giving you enough usage per charge.
- Do not throw old batteries in the general household waste. There is a clear local regulation for battery disposal, please follow the instructions of this policy.
- Do not throw the battery into fire, otherwise it will cause the battery to ignite and explode. Installing batteries, do not apply pressure or force, otherwise it may cause the

battery to leak, overheat or explode.

- If the battery fluid enters the eye it may cause blindness, do not rub your eyes, rinse with fresh water, and then immediately go to the hospital.
- Do not disassemble or modify the battery, otherwise it will lead to battery leakage, overheating, explosion and fire.
- Do not use or leave the battery beside a fire, heater or hot place, otherwise it may lead to battery leakage, overheating, explosion or fire.
- Do not wet the battery, otherwise it may cause the battery to overheat, smoke or corrode. Do not use or leave the battery in direct sunlight or near hot car, otherwise it may result in fluid leakage and overheating may degrade performance and shorten the service life.
- Do not continue charging the battery for more than 24 hours.

1.4Charging Your Mobile Phone

◆ When the charging cable is connected to the mobile phone charge port, the mobile phone battery indicator in the status bar will flash cycle; when the phone is turned off, charging indicator will appear on the phones screen, indicating the battery is charging. When the on-screen battery indicator shows full, and no longer flashing, it indicates that charging has been completed. After charging is complete, disconnect the AC power outlet from the phone and charger.

1.5Charger Precautions

◆ Please use 240V AC. Using other voltage can cause leakage, fire or damage to the phone and charger. Prohibit short-circuit charger, otherwise it will cause electric shock, smoke and damage to the charger. Please do not use the charger if the power cord is damaged, otherwise it may lead to a fire and electric shock.

◆ Please clean dust from the power socket.

◆ Please do not put an liquid containers near the charger, to avoid overheating, leakage and malfunction caused by liquid spills. If the charger comes into contact with water or other liquids, immediately unplug the power from the outlet to prevent overheating, fire, electric shock and malfunction of the charger.

◆ Do not disassemble or modify the charger, it may lead to personal injury, electric shock, fire and damage to the charger.

◆ Please do not use the charger in the bathroom where there is high humidity, otherwise it may cause electric shock, fire and damage to the charger.

1.6Cleaning and Maintenance

■ With a soft, dry cloth clean the phone, battery and charger. Do not use alcohol, thinner or benzene solution to wipe the phone.

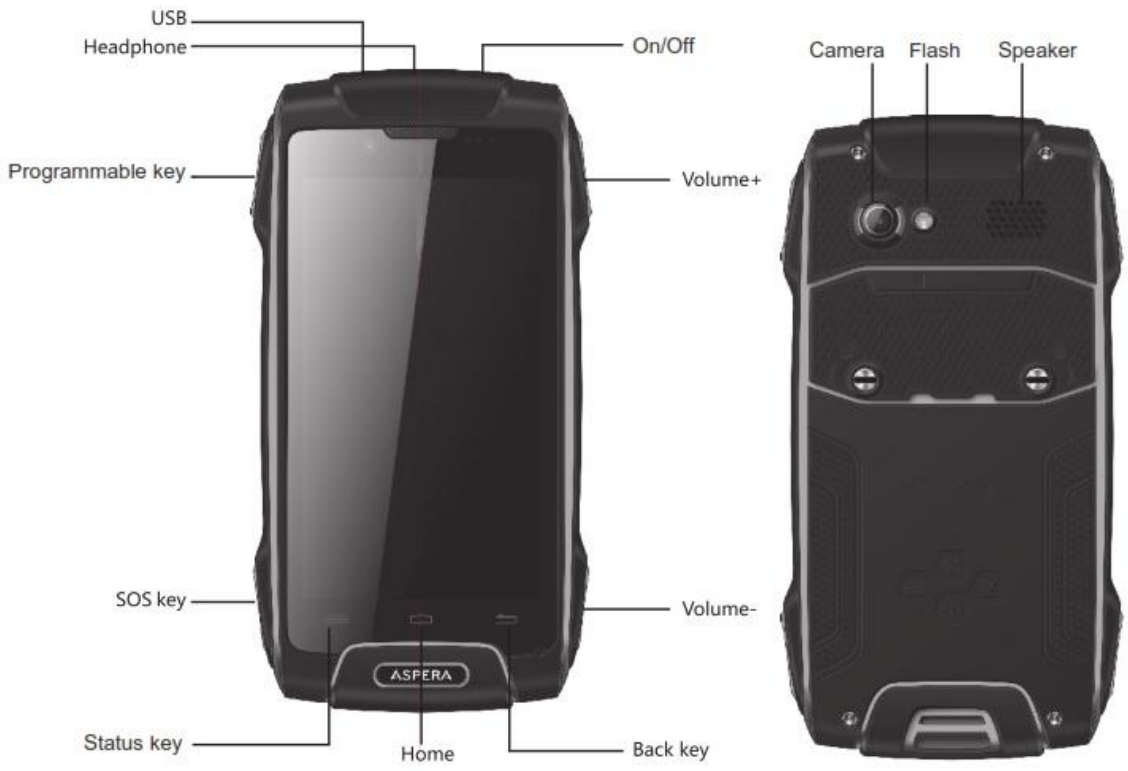
Introduction

2.1Icons

In the status bar you will see small ICONS, details are as follows

Icon	Description
	Strength of the network signal.
	Display missed calls.
	Satellite positioning.
	Receive new message.
	Program download or the download complete.
	The radio is being active.
	The alarm is set.
	The line is in use.
	Music playback.
	Display battery charge state.
	Connected via USB.
	Connected to a wireless network.
	Bluetooth is active.
	SIM card is not inserted.
	Data connection is active.

2.2Phone Layout



Key	Description
On / Off	Press and hold to power the phone On or completely Off Press to wake the phone from sleep state
Programmable Key	Customise the PTT button as a shortcut to launch any installed application on the phone, eg. Press to launch the Camera app. Customise from 'Programmable Key' in the phone Settings

Common Problems & Solutions

If an exception occurs while using your phone, please refer to the following table to troubleshoot

Common problems	The causes	The solutions
Poor signal	Using the mobile phone in poor reception area, such as nearby buildings or in a basement where the radio waves cannot effectively communicate;	Move to an area of stronger network signal
	Problems with the coverage of the base station network of your Network Provider	Ask for the Network Service Providers service area map
Echo or noise	Echo or noise interference in the call	Hang up and redial, you may connect a better line
Standby time is short	Standby time is related to the network system setting	Turn off the mobile phone in the poor reception area.
	The battery is not working at all	Please replace the battery.
	The phone will continue to search for coverage and to find a base station even if there is no coverage. This will use a lot of battery power, causing the standby time to become shorter.	Please move to a strong signal area or turn off the phone.
Unable to boot	The battery power is exhausted.	Check the battery power and recharge it.
SIM card error	SIM card is damaged	Contact your network service supplier.
	SIM card not installed	Make sure SIM Card has been installed properly.
	SIM card metal surface is dirty	Use clean cloth to brush the SIM card metal contact point
Unable to connect to the network	SIM card is invalid	Contact your network service provider
	Beyond the GSM or 3G network service area.	Ask your network service supplier about the service

		area.
	The signal is weak	Please move to a stronger signal area to retry
Unable to call	You may have set up the call barring function	cancel the call barring function.
	You may have set up the fixed dial function	cancel the fixed dial function.
PIN error	If you have input the incorrect PIN Code three times you may have locked the sim card	contact your network service provider.
Unable to charge	Battery or charger damaged	need to replace with a new battery or charger
	Charge in lower than -10℃ or higher than 55℃ environment	change the charging environment
	Bad contact	check whether the charging plug is properly connected
Unable to add phonebook record	Phonebook memory is full	delete some part of the phonebook to create more space.
Unable to set up a function	Network provider may not support this feature	contact your network provider.
